*Dear fellow academicians,  
dear colleagues, dear friends,*

*Ulrich Kunz and Uwe Max Mauer have organized a wonderful congress in Ulm. The scientific program of our 19<sup>th</sup> EMN Meeting included various lectures on car safety systems in civil and military vehicles, pre-hospital medical care: military versus civilian systems, neuro rehabilitation, robotics and outcome, spinal trauma and advances in spine rehabilitation, military and civilian experiences in traumatic brain injuries, peripheral nerve lesions, neuro intensive care and experimental studies.*

*It was a special highlight that our Annual Congress of EMN was held in cooperation with the 1<sup>st</sup> WFNS Committee Meeting of Military Neurosurgeons. Colleagues of different European military forces participated in our congress with interesting lectures and furthermore they chaired our sessions.*

The participants in front of the cathedral in Ulm

The excellent organization of this congress was successful due to the outrageous cooperation between the Executive Board of EMN and the team of the Local Organization Committee, especially Dr. Freude and Dr. Matthieu.

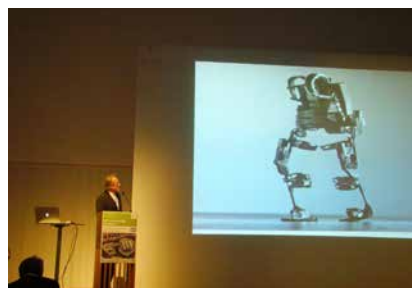

Dr. James Ecklund

Another highlight was Dr. James Ecklund, M.D., Fairfax (USA), introduced by Ulrich Kunz, having held the **Klaus-von-Wild lecture**: „Traumatic brain injury in Military Operations: the U.S. Experience“
